Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Transcription factors are important in regulating gene expression, and their analysis is of paramount interest to molecular biologists studying this area. This book looks at the basic machinery of the cell involved in transcription in eukaryotes and factors that control transcription in eukaryotic cells. It examines the regulatory systems that modulate gene expression in all cells, as well as the more specialized systems that regulate localized gene expression throughout the mammalian organism. Transcription Factors updates classical knowledge with recent advances to provide a full and comprehensive coverage of the field for postgraduates and researchers in molecular biology involved in the study of gene regulation.
