By North Carolina Station

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1889 Excerpt: . organs, some partly develop, others have their filaments dwarfed, and still others develop normal filaments but with anther sacks that are diseased and which liberate only defective or aborted pollen. The remaining stamens apparently produce normal pollen, but fruit will not set when the flowers are self-pollinated. The flower of Rathbun is very similar to that of Premo except that the pistils do not protrude from the flower bud. When Rathbun flowers are self-pollinated we usually get some fruit development, and this fruit may range all the way from almost perfect to no fruit at all. In regard to the question of self-sterility of varieties of dewberries, however, the fact still remains that in many other varieties with healthy normal stamens, complete self-sterility exists. Hence, another solution of the question of sterility must be sought. Petalody in normal plants must not be confused in any...
